NOTE.

INSPECTORATE GENERAL OF CUSTOMS,
STATISTICAL DEPARTMENT,

SHANGHAI, 9th January 1909.

SIR,

A REVISED edition of the "List of Medicines exported from Hankow and the other Yangtze Ports" (II.—Special Series: No. 8) is now issued. It consists of—

Part I.—Alphabetical List of Medicines (with description), and

Part II.—Tariff of Approximate Values of Medicines and Miscellaneous Goods.

In Part II will be found blank value columns, and in these the Inspector General directs that Commissioners are to enter the values, periodically revised, of such articles as may be independent exports of their respective ports. It is also requested that the Hankow office be advised of any important differences which may exist between the Hankow values and those at other ports.

Alterations in values at Hankow will be circulated annually in a Printed Note from this office.

I am,

SIR,

Your obedient Servant,

J. L. CHALMERS,

Acting Statistical Secretary.

To

THE COMMISSIONERS OF CUSTOMS.

PART I.

ALPHABETICAL LIST (WITH DESCRIPTION)
OF THE
MEDICINES EXPORTED FROM HANKOW AND THE
OTHER YANGTZE PORTS.

PART I of this Volume has been compiled chiefly from the following sources:—

1. "Contributions towards the Materia Medica and Natural History of China," by
F. PORTER SMITH, M.B.
2. The different Exhibition Catalogues published by the Imperial Maritime Customs.
3. "Reports on Trade," published by the Imperial Maritime Customs.
4. "Medical Reports," published by the Imperial Maritime Customs.
5. "Consular Reports."
6. Some volumes of the "Journal of the China Branch of the Royal Asiatic Society."
7. "The Chinese Commercial Guide," by S. WELLS WILLIAMS, LL.D.
8. DOOLITTLE'S "Vocabulary and Handbook of the Chinese Language."
9. M'CULLOCH'S "Dictionary of Commerce and Commercial Navigation."

REMARKS ON PART I.

1.—A LIST of all the Medicines exported from Hankow includes, with the exception of a few (about 14), all those of the other Yangtze Ports. Particulars concerning them are to be found scattered over many books and Customs publications. To collect this information in a condensed and convenient form, for the use of "Examining Officers," is the object of this small compilation.

The want of a Chinese Index makes even Dr. PORTER SMITH'S book not very handy as a work of reference to the Customs Officer.

2.—The prices given are those of the newly revised "Tariff of Approximate Values of Medicines, etc., exported from Hankow." The values at Ichang have always been the same as at the latter place; but the prices at the other Yangtze Ports vary in a good many cases. It will be easy to add the latter, in their respective places, at the different ports, and also to make additions or corrections.

Medicines which formerly were dearer at certain places have in many instances become cheaper, and *vice versa*. Greater facilities for communication, regulating supply and demand, easily account for this.

Certain kinds of Medicines, chiefly those to cure fever, to counteract the effects of excessive opium-smoking, and to expel worms, are said to be less in demand, and therefore cheaper, than formerly, owing to the importation of large quantities of Foreign Medicines of the same description. The Chinese acknowledge the greater efficacy of the Foreign drug.

3.—The botanical names given are those used in the books above mentioned. Although added here, the Examiner has very little, or nothing, to do with them.

Great attention has been paid to the Chinese names, and chiefly to those under which the different drugs appear on the Applications. This, it is hoped, will save many inquiries, and be of assistance to new members of the Staff, who often mistake a Medicine when appearing under another name for an entirely new drug.

4.—The Compiler has had the advantage of having seen the majority of these Medicines, partly by passing them in examination, and partly by availing himself of Mr. Examiner L. LIECKE'S kind permission to make use of his nearly complete collection of Hankow Medicines. Many original notes have thus been added.

5.—Medicines occurring in the Customs Tariff are marked with the word "Tariff," and the amount of duty to be paid, in *italic*.

6.—The figures under the heading "Class No." refer to the following classification:—

1. Roots (tubers, corms, bulbs, rhizomes).
 2. Barks and Husks (root barks, peels, rinds, shells).
 3. Twigs and Leaves.
 4. Flowers (buds).
 5. Seeds and Fruits.
 6. Grasses.
 7. Insects.
 8. Sundries.

LIST OF MEDICINES.

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	<i>Hk. Tam.c.</i>		
Ch'a-jou (or Cha-jou)	查肉 (楂肉)	<i>Picul</i>	3.0.0	Large red pomes of a rosaceous mountain shrub, <i>Crataegus pinnatifida</i> , resembling the haws of white-thorn. They are fleshy and sour, and generally cut in slices. Szechwan, Shansi, Hupeh, Honan. See <i>Shan-ch'a</i> (山查).	5
Ch'a-ku.....	茶 菇	"	60.0.0	A kind of mushroom, only produced in Kiangsi, and said to possess exceptionally nourishing and delicate qualities. Very rare. Best quality said to be <i>Hk. Tam.</i> 5 per catty.	8
Ch'ai-hu.....	柴 胡	"	9.0.0 4.0.0	The smaller roots of an umbelliferous plant, said to be <i>Bupleurum octoradiatum</i> . In appearance this drug resembles <i>Ch'ien-hu</i> (前胡). Shensi, Szechwan, Hupeh.	1
Ch'an-i (or Ch'an-t'ui)	蟬衣 (蟬腿)	"	22.0.0	The brownish-yellow skins of a beetle. Cicada skins... Hunan, Hupeh, Szechwan, Chekiang.	7
Ch'ang-p'u (or Shui-ch'ang-p'u).	菖蒲 (水菖蒲)	"	11.0.0	A widely-spread water plant, <i>Acorus calamus</i> . The small, yellow roots show a white cut. The long, sword-like leaves are hung before the doors on the 5th day of the 5th moon. <i>Hsiang-kên-ts'ao</i> (香根草) is another kind of <i>Calamus</i> .	1
Ch'ang-shan.....	常 山	"	7.0.0	Fibrous, woody roots of a very common plant, growing in most every part of China. <i>Lysimachia?</i>	1
Chê-shih-t'ou.....	赭石頭	"	2.0.0	Ochery. A reddish stone, generally in flat pieces; easily powdered. Hupeh, Hunan.	8
Ch'ê-ch'ien (or Ch'ê-ch'ien-ts'ao).	車前 (車前草)	"	3.0.0	"Cart-track." The small, reddish-black, mucilaginous seeds of <i>Plantago major</i> and <i>Plantago Asiatica</i> .	5
Chên-chiao.....	秦 艽	"	15.0.0	Dried, twisted, wrinkled, brown roots of <i>Gendarussa</i> ; vary very much in size and are very bitter. Shansi, Honan, Hupeh, Szechwan, Shantung.	1
Chên-chiao-p'i.....	秦艽皮	"	6.0.0	The root bark of the above.....	2
Ch'ên-sha.....	辰 砂	"	...	See <i>Chu-sha</i> (硃砂).....	8

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	Hk. Tszm.c.		
Chi-hstüeh-chiao.....	鷄血膠	Picul	40.0.0	Fowl-blood glue. Brown cakes about 6 inches long, 3 inches broad, and 1 inch thick. Generally one cake in a small bamboo box. The broken surface shows particles of coagulated blood.	8
Chi-nei-chin (or Chi-chun-p'i).	鷄內金 (鷄肫皮)	"	20.0.0	Fowls gizzard. The lining membrane of the gizzard of the common fowl, peeled off and dried. It is wrinkled, brittle, of yellowish colour, and has often portions of grain, eaten by the fowl, still adherent. Szechwan, Kwangtung, Kiangsu.	8
Chi-shêng.....	寄生	"	5.5.0	Parasitical plants, or, better, epiphytes, as they generally do not derive their nourishment from the trees upon which they are found. All over China. See <i>Sang-chi-shêng</i> (桑寄生), <i>T'ao-chi-shêng</i> (桃寄生), and <i>Liu-chi-shêng</i> (柳寄生). The common mistletoe appears very often under the last two names at Hankow.	3
Chi-t'ou.....	鷄頭	"	3.0.0	See <i>Ch'ien-shih</i> (芡實).....	5
Ch'i-ai.....	蘼艾	"	2.0.0	Mugwort. The dried, downy leaves of <i>Artemisia moxa</i> . Used very much as a charm over the doors on the 5th day of the 5th moon. Western, Central, and Southern China. See <i>Ch'ung-yü</i> (茺蔚) and <i>Yin-ch'ên-hao</i> (茵陳蒿).	3
Ch'i-shê.....	祈蛇	"	...	Snake skins. Only found in the neighbourhood of Ch'i-chou (祈州), about 100 miles below Hankow. Sold by the piece. The best specimens cost <i>Tsz</i> 3 or <i>Tsz</i> 4.	8
Ch'i-tzũ.....	杞子	"	60.0.0 40.0.0	See <i>Kou-ch'i-tzũ</i> (枸杞子).....	5
Chia-ch'ên-hsiang...	假沉香	"	4.0.0	See <i>Chia-mu-t'ou</i> (甲木頭).....	8
Chia - mu - t'ou (or Chia-ch'ên-hsiang).	甲木頭 (假沉香)	"	4.0.0	A black, solid wood, supposed to be <i>Aloës lignum</i> , <i>Aquilaria agallocha Roxburgh</i> . It is sold in pieces about 4 inches long and from 1 to 3 inches thick. The second name implies "Imitation garoo-wood." Szechwan.	8
Chia-o-chiao.....	假阿膠	"	28.0.0 40.0.0	"Imitation asses glue." Small, flat, square, dark tablets, like Indian ink.	8
Chia-p'i (or Wu-chia-p'i).	茄皮 (五茄皮)	"	12.0.0 5.0.0	Root bark of <i>Aralia palmata</i> . Brown, roughly quilled pieces of various sizes, mixed with portions of roots and stems; tasteless, but of pleasant odour. Shensi, Hupeh, and Yangtze Valley.	2
Chia-p'ien (or Ch'uan-shan-chia).	甲片 (穿山甲)	"	80.0.0	Ant-eater, or Pangolin scales. Roughly triangular, and marked at the attached end with fine grooves. Those of the tail are the best. Hupeh, Kiangnan.	8

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADK's System).	Chinese.	Per	Hk. Tam.c.		
Chiang-ch'ung.....	姜 虫	Picul	9.5.0	Dried silkworms.....	7
Ch'iang-huo.....	羌 活	"	15.0.0	Root of an umbelliferous plant, said to be <i>Angelica</i> . It is darker than the root of <i>Tu-huo</i> (獨活), and is marked off into short internodes, of nearly $\frac{3}{4}$ inch in length, by rings and ridges, which indicate joints. The interior is yellow and of woody tissue. Hupeh, Shensi, and Kansu. See <i>Ch'uan-ch'iang</i> (川羌) and <i>Tu-huo</i> (獨活).	1
Ch'iang - huang (or Chiang-huang).	羌 黃 (薑黃)	"	...	Turmeric; dried root of <i>Curcuma longa</i> . The roots are uneven and knotty, difficult to break or cut, and have a light yellow colour. Used as dye, in cookery, and as medicine. <i>Tariff: duty, Hk. Ta 0.1.0.0 per picul.</i> Szechwan, Hunan, Hupeh, and in the South. See <i>Yü-chin</i> (玉金).	1
Chieh-hung.....	桔 紅	"	3.0.0	See <i>Chieh-k'ing</i> (桔梗).....	1
Chieh-k'ing(orChieh-hung).	桔 梗 (桔 紅)	"		The root of a kind of Bellwort, <i>Platycodon grandiflorum</i> . It occurs in short, dark brown pieces, much shrivelled and wrinkled, varying in size from that of a little finger to a writing quill, or even smaller. It has little odour or flavour. Also used to adulterate ginseng. Hupeh, Szechwan, Honan, Shansi.	1
Chieh-tzū(Pai-chieh-tzū, or Chieh-ts'ai-tzū).	芥 子 (白芥子, 芥菜子)	"	3.5.0	Mustard seeds, white. <i>Sinapis alba</i> See <i>Ts'a-chieh</i> (刺芥).	5
Chien-ch'i.....	揀 杞	"	...	See <i>Kou-ch'i-tzū</i> (枸杞子).....	5
Chien-chih	建 杞	"	5.0.0	Large, oblong, orange brown, or yellowish berries of <i>Gardenia radicans</i> . They are about 1 inch in length, and strongly marked with six ribs, which combine to form a crown over the berry. The numerous seeds are contained in a four-celled pericarp, are sour, and stain the saliva deep yellow. Szechwan, Honan, Chekiang.	5
Chien-yao.....	建 藥	"	4.0.0	A dried root resembling <i>Wu-yao</i> (烏藥)..... Szechwan, Hunan, Kwangsi.	1
Chien-yüan-p'i.....	建 元 皮	"	13.0.0	The thin, outside peel of various kinds of <i>Citrus</i> Southern and Central China.	2
Ch'ien-chin(orCh'ien-chin-tzū).	千 金 (千金子)	"	13.5.0	A small, darkish-grey bean.....	5

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	Hk. \$ & m. c.		
Ch'ien-hu	前 胡	Picul	4.5.0	<i>Angelica?</i> <i>Smilax carex</i> . Brittle, branching, irregular, tapering pieces of root. Surface brown, much wrinkled, with hairy rootlets on the top of the root-stock, to which a portion of the stem is sometimes attached. The interior is of a dirty white colour; the taste is agreeably bitterish; odour not strong. It grows in watery places in Szechwan, Shensi, Hupeh, Hunan, Anhwei. See <i>Tu-huo</i> (獨活).	1
Ch'ien-niu-tzŭ	牽 牛 子	"	2.0.0	See <i>Êrh-ch'ou</i> (二丑)	5
Ch'ien-shih (or Chit'ou).	芡 實 (雞 頭)	"	3.0.0	The fruit of <i>Euryale ferox</i> . It is pear-shaped, and contains oval seeds of a reddish colour, mottled, and veined with a whitish marbling. The interior is hard and starchy. Szechwan, Kiangsu, Fukien, etc.	5
Ch'ien-ts'ao	茜 草	"	7.0.0	A species of madder. <i>Rubia munjista</i> . Used as a dye, and as medicine. It is poisonous. Often appears under the name of <i>Ti-hsüeh</i> (地 血), "Ground blood." From Hupeh, but seemingly common in Central China.	1
Ch'ien-ts'êng-chih (or P'o-ku-chih).	千 層 紙 (破 故 紙)	"	18.0.0	<i>Psoralea corylifolia</i> . Flat, oval seeds, with the five-lobed calyx (like paper) still fixed to them. It has a bitter flavour and aromatic smell. Southern and Western China.	5
Chih-jou (Yüan-chih-jou, or Chih-t'ung).	志 肉 (遠 志 肉, 志 通)	"	14.0.0	<i>Polygala tenuifolia</i> . Thin, tubular, brownish-grey pieces, of a peculiar strong smell. The core has generally been removed. Shensi, Honan, Szechwan.	1
Chih-k'o	枳 殼	"	5.0.0	<i>Citrus fusca</i> . A kind of unripe orange cut in halves and sun-dried. Aromatic flavour. The peel is very hard and thick. Hupeh, Shensi, Szechwan.	5
Chih-ma (Pai-chih-ma, or Hei-chih-ma).	芝 蔴 (白 芝 蔴, 黑 芝 蔴)	"	...	Sesamum seed. <i>Sesamum Indicum</i> . White and black (<i>Pai-chih-ma</i> and <i>Hei-chih-ma</i>). The seed capsules are four-cornered, two-valved, and of a dark brown or black colour. An oil is pressed out of the seed, and the refuse of the latter used as manure, or, in form of a paste, to adulterate opium. <i>Tariff: duty, Hk. \$ 0.13.5 per picul.</i> Honan, and all Central China.	5
Chih-ma-liao	芝 蔴 料	"	15.0.0	Sesamum-seed cake-stuff. A soft, black pulp, showing a brown cut. It is made of sesamum seed, after the oil is pressed out.	8
Chih-ma-yu (or Hsiang-yu).	芝 蔴 油 (香 油)	"	...	Sesamum-seed oil. An oil pressed out of both kinds of sesamum seed. It has an agreeable smell, and is therefore also called <i>Hsiang-yu</i> . It answers all the purposes of olive oil. <i>Tariff: duty, Hk. \$ 0.3.0.0 per picul.</i>	8

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE's System).	Chinese.	Per	Hk. Tsm. c.		
Chih-mu	知母	Picul	6.0.0	The rhizome of <i>Anemarrhena asphodeloides</i> . Irregular, flattened, twisted, shrivelled pieces, from 2 to 3 inches in length, and generally covered with reddish or yellowish-brown hairs. The interior is yellow, spongy or mealy, of agreeable odour, and of slightly bitter taste. Honan, Shansi, Shensi, Anhwei, Kiangsu, Szechwan.	1
Chih-shih	枳實	"	4.0.0	A smaller kind of <i>Citrus fusa</i> . The unripe fruit (orange) is cut into pieces like <i>Chih-k'o</i> (枳殼).	5
Chih-t'ung	志通	"	...	See <i>Yuan-chih</i> (遠志) and <i>Chih-jou</i> (志肉).....	1
Ch'ih-hsiao-tou	赤小豆	"	8.0.0	See <i>Hsiao-tou</i> (小豆).....	5
Ch'ih-ma	赤麻	"	45.0.0	See <i>T'ien-ma</i> (天麻).....	1
Ch'ih-shao	赤芍	"	10.0.0		
		"	6.0.0	Dried roots of <i>Paeonia rubra</i> . Straight, hard, pinkish-buff pieces, furrowed longitudinally. Szechwan and also from the North. See <i>Pai-shao</i> (白芍).	1
Chin-ch'ai	金釵	"	120.0.0	A kind of <i>Dendrobium ceraja</i> , having thin, straight, jointed, solid, cylindrical stems, of a yellow, golden colour, and often deeply striated or furrowed. They are very tenacious of life, recovering after having been dried. Anhwei, Kiangsi, Kwangtung, Honan, Yunnan, Szechwan. See <i>Hu-tou</i> (斛斗).	6
Chin-chên-ts'ai (or Huang-hua-ts'ai).	金針菜 (黃花菜)	"	...	Lily flowers. The dried flowers of <i>Hemerocallis graminea</i> and of <i>Lilium bulbiferum</i> . They are usually twisted into lengths of 4 or 5 inches. The colour is dark brownish-yellow. Used as food, and as medicine. <i>Tariff: duty, Hk. Tm. 0.2.7.0 per picul.</i> Szechwan and Yangtze Valley.	4
Chin-hu-tou	金斛斗	"	25.0.0	The yellow stems of <i>Dendrobium ceraja</i> See <i>Hu-tou</i> (斛斗), <i>Yu-tou</i> (雅斗), and <i>Chin-ch'ai</i> (金釵).	6
Chin-ling-tz'u	金鈴子	"	...	See <i>Lien-tzu</i> (棟子).....	5
Chin-niu-ts'ao	金牛草	"	20.0.0	A small herb about 3 inches high, with flowers and rootlets attached to it. <i>Ardisia Japonica</i> . Central and South China.	6
Chin-pu-huan	金不換	"	...	See <i>Ch'uan-san-ch'i</i> (川三七).....	1
Chin-yin-hua	金銀花	"	...	<i>Caprifolium Chinense</i> . "Gold and silver flowers." Honeysuckle. See <i>Mi-yin-hua</i> (密銀花) and <i>Shan-yin-hua</i> (山銀花).	4

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	Hk. Tsm.c.		
Chin-ying-tzü.....	金櫻子	Picul	3.0.0	Large fruit of the Dog Rose, <i>Rosa canina</i> Shantung, Kiangsi, Hupeh, and other provinces.	5
Ch'in-chiao.....	秦椒	"	8.5.0	See <i>Hua-chiao</i> (花椒).....	5
Ching-chieh.....	荊芥	"	5.0.0		
		"	3.0.0	<i>Salvia minutiflora</i> , <i>Salvia plebeia</i> , <i>Nepeta tenuifolia</i> . Sage. The stalks are of a brownish colour and have an aromatic smell. Szechwan, Hunan, Kiangsu, Fukien.	6
Ching-san-lêng.....	荊三稜	"	...	See <i>San-lêng</i> (三稜).....	1
Ching-shu.....	京朮	"	15.0.0	See <i>Shu</i> (朮), <i>Atractylodes rubra</i>	1
Ching-tan.....	京胆	"	7.0.0		
Ch'ing-chin-shih.....	青金石	"	3.0.0	Golden mica. A substance consisting of small, thin, marbled layers, which shine, somewhat like mother- of-pearl shell. Szechwan, Kweichow, Kiangnan.	8
Ch'ing-fan.....	青礬	"	...	Copperas. There are three sorts of copperas:— 1. The green, or sulphate of iron; also called "green vitriol." 2. The blue, or sulphate of copper; also called "blue vitriol." 3. The white, or sulphate of zinc; also called "white vitriol." The Hankow copperas is an impure sulphate of iron, obtained by roasting iron pyrites. <i>Tariff: duty,</i> <i>Hk. Ts. 0.1.0.0 per picul.</i> Anhwei, Hunan, Shansi, Szechwan, Hupeh. See <i>Tan-fan</i> (胆礬).	8
Ch'ing-fên (Shui-yin- fên, or Hung-fên).	輕粉 (水銀粉, 汞粉)	"	50.0.0	"Light powder." Calomel. It is made in large quan- tities at Hankow. Common salt, mercury, and alum are mixed in certain proportions, placed in an iron platter covered over with an earthen dish, and exposed to a strong charcoal fire for four hours. Water is thrown upon the upper pan, and the removal of it shows the calomel condensed in the form of a beautiful, white, glistening, feathery sublimate upon the inner surface of the upper dish. One ounce of mercury is said to yield $\frac{8}{10}$ oz. of calomel. It is generally packed in small, square, chip boxes, like match-boxes, or in six-cornered bamboo boxes about 5 inches high and 2 inches in diameter. Shensi, Shansi, Anhwei, Hupeh, Szechwan.	8
		"	32.0.0		
Ch'ing-hao.....	青蒿	"	1.5.0	"Green herbage"..... See <i>Ch'iu-hao</i> (秋蒿).	6
Ch'ing - mu - hsiang (or T'u-ch'ing-mu- hsiang).	青木香 (土青 木香)	"	4.0.0	Dried, light-brown, knotty roots of <i>Aristolochia contorta</i> . Szechwan, Hupeh, Shensi.	1

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	<i>11k. T'ām.c.</i>		
Ch'ing-p'i (Hsiao-ch'ing-p'i, or Ch'ing-chü-p'i).	青皮 (小青皮, 青橘皮)	<i>Picul</i>	4.0.0	Small, smooth, unripe fruits of several species of <i>Citrus</i> , dried whilst green, and cut into slices or sections of $\frac{1}{2}$ inch to 1 inch across, or more. The seeds are removed. When fresh they are very fragrant. Szechwan and some parts of Yunnan, Kweichow, and Hupeh.	5
Ch'ing-tai	青黛	"	22.0.0 15.0.0	A kind of indigo, in the shape of blue powder. This is the only indigo used medicinally. Shantung, Shensi, Kansu, and Yangtze Valley.	8
Ch'ing-yen (Jung-yen, or Kuang-ming-yen).	青鹽 (戎鹽, 光明鹽)	"	7.0.0	A kind of bay-salt, or crystallised salt, in the form of blackish, cubic crystals. Kansu, Szechwan, Chihli.	8
Ch'ing-yuan-p'i	青遠皮	"	2.0.0	The thick, silver-grey bark of a tree. The inner surface is yellow. Szechwan, Hunan, and parts of Hupeh.	2
Ch'io-mei-jên	雀梅仁	"	19.0.0	"Bird cherries"	5
				See <i>Li-jên</i> (李仁).	
Chiu-hsiang-ch'ung..	九香虫	"	12.0.0	A tree-bug. It is black, has a flat back and round belly. The head is pointed. When fresh it has a very strong, disagreeable odour; hence the Chinese name, which means "the insect of nine smells."	7
Chiu-ts'ai-tzû	韭菜子	"	8.0.0	"Leek seed." <i>Allium ascalonicum</i> . Very small, thin seeds of a black colour. The bulbs of this plant are pickled.	5
Ch'iu-hao (or Ch'ing hao).	秋蒿 (青蒿)	"	1.5.0	"Autumn or green herbage." Tausy. <i>Artemisia dracunculua</i> , <i>Artemisia desertorum</i> . A herb with very small, yellowish flowers; the stem when dried is reddish. Cultivated and wild in most parts of China.	6
Ch'iu-shih (or Ch'iu-shih-tan).	秋石 (秋石丹)	"	10.0.0	Urea. It is obtained by boiling down boys' urine, sulphate of lime or common salt being added, to hasten crystallisation and to increase the quantity obtained. It is also used to soften fresh meat required for immediate use. It is sold in small, whitish, cup-like cakes. Hupeh, Anhwei, Szechwan.	8
Ch'ou-ts'ung-jung....	臭菰蓉	"	...	"Stinking <i>Ts'ung-jung</i> "	1
				See <i>Ts'ung-jung</i> (菰蓉).	
Ch'ou-wu-i (or Wu-i)	臭蕪荑 (蕪荑)	"	26.0.0 15.0.0	"Stinking <i>Wu-i</i> ." A small, lentil-shaped seed of a very disagreeable and strong odour. The flesh of the berry generally adheres to the seed. Kiangsu, Szechwan, Hupeh.	5

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	Hk. Ts. m. c.		
Chu-huang (Chu-kao, or T'ien-chu-huang)	竹黃 (竹膏, 天竹黃)	Picul "	22.0.0 35.0.0	Tahashir. A siliceous concretion found in the joints of the bamboo. It appears in hard, broken, angular, opaque pieces, of a white or bluish, vitreous colour. It is very brittle, and is usually adulterated with bone earth and other substances. Southern China and Yangtze Valley.	8
Chu-kên (or Chu-kên-ch'i).	竹根 (竹根漆)	"	14.0.0	Bamboo roots. Whitish-grey, wrinkled, knobby roots of very irregular shape. All over China.	1
Chu-ling.....	猪苓 (朱苓)	" "	15.0.0 8.0.0	"Pigs tumors." A corky excrescence found on the trunk or root-stock of the Liquidambar tree. Tubiform and of irregular size. The outside is of a dark brown colour, rough, and often worm-eaten; the interior is yellowish-brown, and not unlike cork. The tubers resemble the excrement of pigs; hence the name. <i>Pachyma helen?</i> Szechwan, Kweichow, Hupeh.	8
Chu-p'iao.....	硃 膘	"	85.0.0	A beautiful red, chalky substance; it is a chemical preparation, much resembling <i>Hung-fên</i> in colour. Hankow and other places in Hupeh.	8
Chu-sha (Tan-sha, or Ch'ên-sha).	硃 砂 (丹 砂, 辰 砂)	"	...	Cinnabar, the most frequent ore of mercury. It is also made artificially on a large scale in Hankow and other places by fusing a mixture of sulphur (2 catties) and mercury (1 catty), and subliming it. There are about 10 different sorts of cinnabar. That from Chenchow (辰州), in Hunan, is said to be the best; hence the name <i>Ch'ên-sha</i> . Enormous quantities of cinnabar are used in China. Red is the colour of rejoicing with the Chinese, and vermilion is therefore used in documents, etc. <i>Tariff: duty, Hk. Ts. 0.7.5.0 per picul.</i> Szechwan, Kwangtung, Kwangsi, Kweichow, Hunan, Hupeh, Shensi. See <i>Yin-chu</i> (銀 硃).	8
Chu-sha-p'ien.....	硃 砂 片	Catty	2.0.0	A kind of cinnabar.....	8
Chu-shên.....	珠 參	Picul	35.0.0	Small, tuberiform roots of very irregular shape, with wrinkled surface, and of grey and yellowish-grey colour. The inside is of a resinous colour and has a very bitter taste. Szechwan.	1
Chu-ya-tsao chia.....	猪 牙 皂 莢	"	...	See <i>Ya-tsao</i> (牙 皂).....	5
Ch'u-shih-tzŭ.....	楮 實 子	"	4.0.0	Small, round seeds of the paper mulberry tree. <i>Bros-sonetia papyrifera</i> . The seed is of a bright red colour. Hankow, Szechwan, Yangtze Valley.	5

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	Hk. Tam.c.		
Ch'uan-ch'iang.....	川 羌	Picul	15.0.0	The knotty root of an umbelliferous plant. It is of brownish colour, and has a peculiar, musk-like odour. Usually bristled with hairy radicles. It is a variety of <i>Ch'iang-huo</i> from Szechwan. See <i>Ch'iang-huo</i> (羌活).	1
Ch'uan-fu.....	川 附	"	5.0.0	<i>Aconitum variegatum</i> . It is a dark-brown, turnip-shaped tuber, generally 2 inches in length and 6 inches in circumference. When cut open it shows an ashy grey, greasy interior, having on the surface of the fracture a distinct mark, in the shape of a somewhat irregular star. When fresh it is called <i>Shing-fu</i> (生附). The root is generally salted, and is then called <i>Yen-fu</i> (鹽附); after having been dried it goes under the name of <i>Kan-yen-fu</i> (乾鹽附). When two years old it is simply called <i>Fu-tzu</i> (附子); when three years old, <i>Lou-fu</i> (潯附); when four years old, <i>T'ien-hsiung</i> (天雄). When cut into longitudinal slices it is called <i>Fu-p'ien</i> (附片) or <i>Fu-p'ien-fu</i> (附片附). Cut into halves, it assumes the name <i>Fu-k'uai</i> (附塊). Szechwan. The Shansi drug, <i>Hsi-fu</i> (西附), is smaller and of a more regular shape. It is also of a deeper brown, and costs <i>Ta</i> 10 per picul. See <i>Ts'ao-wu-t'ou</i> (草烏頭).	1
Ch'uan-hsi (Ch'uan-niu-hsi, or Ch'uan-hsi).	川 膝 (川牛膝, 川夕)	"	12.0.0	Root of <i>Pupalia geniculata</i> , the <i>Achyranthes aspera</i> of LINNÆUS. Szechwan. See <i>Niu-hsi</i> (牛膝).	1
Ch'uan-hsieh.....	川 瀉	"	4.5.0	Rhizome of a water plant. <i>Alisma plantago</i> . Thin, circular sections of the rhizome. It is a better sort of <i>Tu-hsieh</i> (澤瀉), which see. Szechwan.	1
Ch'uan-hsiung.....	川 芎	"	8.0.0	Belongs to the order of <i>Levisticum</i> , and closely resembles, both in smell and shape, the <i>Tang-kuei</i> , except that the ball of the root has been denuded of its excrescences. The root is fibrous and tough, and when cut emits a penetrating, pungent, but pleasant odour. It has been suggested that this is merely a wild species of <i>Tang-kuei</i> , as the points of resemblance are numerous. Szechwan. See <i>Hsi-hsiung</i> (西芎).	1
Ch'uan-kan-sung.....	川 甘 松	"	...	See <i>Ch'uan-sung</i> (川松).....	1
Ch'uan-lien-tzu.....	川 楝 子	"	1.0.0	The fleshy, globular cherry of the <i>Melia</i> tree, covered with a shining, yellow skin, usually shrivelled. The inside stone is grooved longitudinally, marking the interior six or eight cells. The latter contain black seed-kernels. Szechwan.	5

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	Hk. P&M.C.		
Ch'uan-niu-hsi.....	川牛膝	Picul	...	See Niu-hsi (牛膝).....	1
Ch'uan-pa-mi.....	川巴米	"	10.0.0	The seed-kernels of <i>Ch'uan-pa-tou</i> , without the husks..	5
Ch'uan - pa - tou (or Pa-tou).	川巴豆(巴豆)	"	4.5.0	Fruit of <i>Croton tiglium</i> . The fruit is ohlong, somewhat triangular, about $\frac{3}{4}$ inch long, three-celled, and of a yellowish-brown colour. Each cell contains an oval, flattened, imperfectly quadrangular seed. The seed is poisonous and of a very acrid taste. The character <i>pa</i> (巴) refers to an old name of the province of Szechwan or a large part of it. The town called Pa-tung-hsien (巴東縣) is now in the province of Hupeh.	5
Ch'uan - pei (or Ch'uan-pei-mu).	川貝(川貝母)	"	165.0.0	"Mother-of-pearl," from Szechwan. The corms of <i>Uvularia grandiflora</i> . They are dug up in early autumn and in spring. Those of Szechwan are naked, of a white or yellow colour, and may be easily broken, disclosing the central shoot. They vary in size from that of a pea to that of a small marble, and are easily crushed by the teeth to a white, starchy, and almost tasteless powder. The drug from Hupeh and that grown near Ningpo is larger. <i>Lu-pei</i> is a species of <i>Pei-mu</i> , but inferior in quality. The corms are not of so clean a white, are generally larger, and in shape more ohlong.	1
Ch'uan-san-ch'i (San-ch'i, or Shui-hsi).	川三七(三七水膝) 90 pieces to catty 110 " " " " 140 " " " " 170 " " " " 220 " " " " 280 " " " "	Catty	1.4.0 to 3.0.0 3.0.0 2.8.0 2.6.0 2.4.0 2.0.0 1.4.0	A species of <i>Amomum</i> . "Threes and sevens"; so named from the irregular arrangement of the leaves of the plant of which this drug is the root. It occurs in tapering pieces, up to 1 inch in length. The yellow, external surface is wrinkled, marked with small nodules and ridges, and the interior is of a pale yellow, resinous colour. Taste bitter and slightly saccharine. From Szechwan and Kwangsi (廣三七); the best comes from Tienchow (田州), and is therefore called <i>T'ien-san-ch'i</i> (田三七). It is said to give courage, and is consequently in great repute amongst soldiers. <i>Jên-shên-san-ch'i</i> (人參三七) ("ginseng san-ch'i") and <i>Chin-pu-huan</i> (金不換) ("not to be exchanged for gold") are also names for this drug, denoting its value.	1
Ch'uan-san-chia.....	穿山甲	Picul	80.0.0	See Chia-p'ien (甲片).....	8
Ch'uan-shao.....	川芎	"	6.0.0	See Ch'ih-shao (赤芎).....	1
Ch'uan-sung(Ch'uan-kan-sung, or Kan-sung).	川松(川甘松, 甘松)	"	7.0.0	The rhizomes of a kind of <i>Valeriana</i> , from Szechwan and Shensi. They are covered with dried, reddish-brown leaves, and have a mass of rootlets attached to them. The taste is bitter, and the odour faint but not unpleasant.	1

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE's System).	Chinese.	Per	Hk. Tam.c.		
Ch'uan-tan.....	川 旦	Picul	4.0.0	<i>Lamium petiolatum</i> . A grey root, with rough surface, and with numerous rootlets attached to it. Taste agreeably aromatic. Szechwan.	1
Ch'uan-tang.....	川 黨	"	...	See <i>Tang-shên</i> (黨 參).....	1
Ch'uan-tung.....	川 冬	"	...	See <i>Mai-tung</i> (麥 冬).....	1
Ch'uan-wu(or Ch'uan-wu-t'ou).	川 烏 (川 烏 頭)	"	3.5.0	"Crow's head." The conical, tuberous roots of <i>Aconitum Chinense</i> . Numerous rootlets project irregularly from the surface. The latter is rough and hard and of brownish-black colour; the interior is mealy, firm, and of dirty white colour. Taste bitter and acrid. Szechwan.	1
Chung-shu.....	種 朮	"	25.0.0	<i>Atractylodes alba</i> See <i>Shu</i> (朮).	1
Ch'ung - ts'ao (or Tung-ch'ung-hsia-ts'ao).	蟲 草 (冬 蟲 夏 草)	"	400.0.0	<i>Cordyceps Chinensis</i> . A kind of fungus. "In winter an insect, in summer a plant." It grows upon the head of a caterpillar, as a disease of the insect. Sold in small bundles, generally tied together with red cotton. Each of the pieces consists of two distinct portions; one, which is larger and belongs to the insect, of a yellowish-brown colour, and another, more flexible, the fungus part. It was in former times esteemed even more highly than ginseng. Szechwan, Hupeh, Tibet.	8
Ch'ung-yü (or I-mu-ts'ao).	茺 蔚 (益 母 草)	"	6.0.0	A herb, growing all over China. <i>Leonurus Sinensis</i> . The stems are square and woody; the leaves pinatifid. The taste is bitter. Sold in small bundles. It is used by women in childbed; hence the name, "Benefit mother grass."	6
Ch'ung-yü-tzû (or I-mu-tzû).	茺 蔚 子 (益 母 子)	"	7.0.0	The small, brown, cornered seeds of the above.....	5
Chü-hai.....	橘 核	"	2.5.0	Seeds of a kind of orange.....	5
Chü-hua (Pai-chü-hua, or Huang-chü-hua).	菊 花 (白 菊 花 黃 菊 花)	"	6.0.0	<i>Chrysanthemum</i> flowers. There are innumerable varieties of this flower in China. <i>Chrysanthemum album</i> and <i>Chrysanthemum flavum</i> . Honan, Szechwan, Hupeh, Hunan.	4
Chü-hung.....	橘 紅	"	12.0.0	<i>Citrus aurantium</i> . The skin of the fruit, an immature orange. The real <i>Chü-hung</i> is very dear; it is therefore generally adulterated with pumelo peel, etc. Two skins, tied together, cost 5 cents at Canton. The small bundles are generally bound with red cotton. Szechwan.	2
Chü-lo.....	橘 絡	"	60.0.0	Orange threads. The small, white, fibrous threads around the flesh of oranges. Southern and Central China.	8

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE's System).	Chinese.	Per	Hk. T&M.C.		
Ch'ü-mai (or Ch'ü-mai-ts'ao).	瞿麥 (瞿麥草)	Picul	1.5.0	<i>Dianthus Fischeri</i> . The dried plant, with reddish flowers. Grows all over China, mostly in wheat-fields, and is sold in large bundles.	6
Chü-shêng-tzŭ.....	巨勝子	"	3.0.0	Said to be a kind of sesamum seed. This would appear to be an error, as these seeds bear no resemblance to sesamum seed. They are yellowish-brown, oblong, and have all the appearance of fennel seed.	5
Ch'üan - ch'ung (or Ch'üan-hsieh)	全虫 (全蠍)	"	40.0.0	Salted scorpions. <i>Scorpio Europæus</i> . 1 to 2 inches in length. The tail has six joints, and ends in a sharp, bent sting. Shantung, Honan, Hupeh, Hunan, Kweichow.	7
Chüeh-ming.....	決明	"	...	See <i>Ts'ao-chüeh-ming</i> (草決明).....	5
Chün-tzŭ (or Shih-chün-tzŭ).	君子 (使君子)	"	3.0.0	<i>Quisqualis Chinensis</i> . Oblong, five-cornered fruit, containing a black kernel with two cotyledons. The latter are oily-yellow, and have a not unpleasant taste. Four or five seeds roasted and eaten are said to expel worms. Canton, Fukien, Szechwan, and other provinces.	5
Êrh-ch'ou (or Ch'ien-niu-tzŭ).	二丑 (牽牛子)	"	2.0.0	The mixed, triangular, black and white seeds of <i>Pharbitis ipomœa nil</i> , known as <i>Hei-ch'ou</i> (黑丑) and <i>Pai-ch'ou</i> (白丑). They have a sweetish and subacid taste. Szechwan, Yunnan, Hunan.	5
Fa-ts'ai.....	髮菜	"	40.0.0 20.0.0	"Hair vegetable." A black moss, resembling hair. The inferior kind is mixed with whitish moss.	8
Fang-chi.....	方己 (防己)	"	6.0.0	A brown, bulky, tuberous root of a <i>Convolvulus</i> . Taste bitterish; smell agreeable. The inside is mealy white. Shensi, Hupeh, Szechwan.	1
Fang-fêng (or Shui-fêng).	防風 (水風)	"	7.0.0	<i>Libanotis</i> . This root is sold in long, brownish-yellow, irregular, branching pieces, having part of the branching stem still attached to the root-stock. Taste sweetish aromatic. Honan, Shantung, Chihli, Shensi, Szechwan.	1
Fang-tang.....	方黨	"	...	See <i>Tang-shên</i> (黨參).....	1
Fang-tang-shên.....	方黨參	"	...	<i>Campanula</i> . This root is met with in bundles of long, tapering, angular pieces of a dirty brown colour, marked with wrinkles and fissures, or transverse rings. They average about 1 foot in length, and are more or less brittle, according to age. The cross-section is of a lighter colour, but the pith is firm and dark yellow. The outside is generally marked with dark patches of the dried juice. It is used like ginseng. Hupeh, Szechwan, Honan.	1

Hu-p'o.....	琥珀	<i>Catty</i>	2.0.0 to 8.0.0	Amber. It is a fossil gum of a dark brown colour found in certain geological formations or thrown up on the sea-shore. It is insoluble in water and alcohol, but soluble in sulphuric acid and in alkalis. Yunnan.	8
Hu-p'o-mo.....	琥珀末	<i>Picul</i>	50.0.0	Amber powder. Much adulterated with colophony and copal.	8
Hu-tan.....	湖丹	"	11.0.0	Root bark of a kind of <i>Pæonia</i> Yangtze Valley, Shensi, Honan. See <i>P'a-tan</i> (杞丹).	2
Hu-tou.....	斛斗 (藿斗)	"	45.0.0	The yellow stalks of an epiphyte, <i>Dendrobium ceraja</i> , which grows upon stones; hence it is called <i>Shih-tu</i> (石斛). This plant is very tenacious of life, and recovers after having been dried. At Hankow it is sold fresh with the roots, and is then called <i>Hsien-hu-tou</i> (鲜斛斗), or "fresh" <i>hu-tou</i> . The stalks are brought into commerce dried, and are then of a yellow, golden colour, with traces of roots attached to them; they then bear the names of <i>Chin-hu-tou</i> (金斛斗), <i>Ya-tou</i> (雅斗), <i>Chin-ch'ai</i> (金钗). Southern and Central China.	6
Hua-chiao (or Ch'in-chiao).	花椒 (秦椒)	"	8.5.0 5.0.0	Wild pepper. <i>Xanthoxylum alatum</i> . Small red carpels enclosing the round, black, shining seed. The latter has an aromatic odour and a peculiar, pungent flavour, with an acrid after-taste. Shensi, Hupeh, Szechwan.	5
Hua-fên.....	花粉	"	4.0.0	See <i>T'ien-hua-fên</i> (天花粉).....	1
Hua-ju-shih.....	花乳石	"	3.0.0	Dolomite. It is found in irregular, roundish masses, greyish-brown on the outside and of greenish colour in the interior. It is powdered and then used as medicine. Shensi, Shansi, Honan, Chekiang.	8
Hua-shêng (or Lo-hua-shêng).	花生 (落花生)	"	...	Ground-nut, Earth-nut, Pea-nut. Fruit of <i>Arachis hypogæa</i> . An oil expressed from them is used for cooking and lighting. The refuse is used as manure. When the fruit begins to develop the plant bends downwards and thrusts its fruit into the ground, where the nut matures; hence the name. <i>Tariff</i> : duty, <i>Hk. Ts.</i> 0.1.0.0 per picul. In most every part of China, chiefly in sandy soil.	5
Hua-shih.....	滑石	"	0.8.0	A kind of soapstone. When powdered it has a talcky feel. It is often used in that state to adulterate <i>Yün-mu-fên</i> (雲母粉). Shantung, Hunan, Kwangsi.	8
Huai-mi.....	槐米	"	2.5.0	The unopened buds of the flower of the Huai tree. <i>Sophora Japonica</i> . In appearance they resemble small grains of yellow rice. Used medicinally and as a dye. Common in Northern and Southern China.	4

Huai-niu-hsi.....	懷牛膝	Picul	...	See Niu-hsi (牛膝).....	1
Huai-shan (Huai-shan-yao, or Shan-yao).	淮山(淮山藥山藥)	"	25.0.0	<i>Dioscorea sativa</i> . It occurs in long, tuberose roots of about $\frac{1}{2}$ foot in length and 2 inches in circumference, and when divested of its rind and the ends are trimmed, it has a perfectly white surface and interior. It is brittle, has no smell, and is tasteless. The value depends on the length and thickness of the roots, small, broken pieces selling for <i>Tls</i> 5, while the long, thick pieces fetch as much as <i>Tls</i> 25, per picul. Exported in large quantities from Hankow.	1
		"	14.0.0		
		"	9.0.0		
Huang-ch'i.....	黃芪(黃耆)	"	50.0.0	The long, straight roots of <i>Sophora tomentosa</i> . If fresh they are pliable, and when cut into, yield a faint, aromatic fragrance. The bark is pale yellowish-brown, streaked with a darker tint of the same colour. The texture of the root is porous and the inner skin pale yellow, deepening into a brighter shade in the centre. When dried they lose all fragrance; the colours, externally and internally, fade perceptibly; and their flexibility disappears. The pieces are generally 2 feet long. Five qualities are acknowledged. Shansi, Kansu, Hupeh.	1

Shê-hsiang	麝 香	Catty	Musk is the dried secretion of the preputial follicles of a species of antelope, or hornless deer, commonly referred to the <i>Moschus moschiferus</i> of LINNÆUS. The animal is met with in Tibet, Annam, and Central India. Good musk is in irregular, unctuous, light, dry, reddish-black or dark purple grains, concreted in an oval bag about 1½ inches in diameter, hairy on one side and not on the other. The small, dark bags, with the greyish hairs arranged evenly round the centre, are the best. The taste is bitter and aromatic, and the smell penetrating and peculiar. The trace, when rubbed on paper, is a lively yellow, and no grittiness is felt or residue left. Adulterations are frequent. Besides being used as a medicine, it is used as a perfume, and to scent the Chinese ink. Tariff: duty, Hk. Tsm. 0.9.0.0 per catty. Kwangsi, Yunnan, Hunan, Honan, Shansi, Kansu, Szechwan.	8
Shê-kan	射 干	Picul	3.5.0	Dark, irregular rhizomes of <i>Pandanthus Chinensis</i> . It is very hard, bristled with rootlets, and of a chromé-yellow colour in the interior. When fresh the taste is acrid. Szechwan, Honan, Kiangsu.	1
Shê-p'í (or Shê-t'ui) ..	蛇 皮 (蛇 腿, 蛇 蛻)	"	...	Snake skins. See <i>Ch'i-shê</i> (祈 蛇).	8
Shên-chin-ts'ao	伸 金 草	"	3.0.0	A moss-like herb of shining green colour	6
Shên-ch'ü (or T'u-shên-ch'ü).	神 麵 (土 神 麵)	"	10.0.0	Medicine tea. A brick-shaped medicine, composed of coarse leaves and stalks, mixed with various kinds of medicinal herbs, packed in bundles weighing 64 catties each. Hupeh, Fukien.	8
Shên-yeh	參 葉	"	65.0.0	See <i>Jên-shên-yeh</i> (人 參 葉)	3
Shêng-chiang	生 姜	"	...	Fresh ginger. Grown in large quantities in Southern China and in some provinces of Central China. It is inferior in taste and strength to the foreign ginger.	1

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE's System).	Chinese.	Per	Hk. Tam.c.		
Shêng-chu.....	生 珠	Picul	...	Neither Chinese nor Europeans seem to have seen this medicine, although it is contained in the Hankow Tariff of Medicines. It is probably only another or local name for one of the recognised medicines.	...
Shêng-fu-tzû	生 附 子	"	...	See <i>Ch'uan-fu</i> (川 附).....	1
Shêng-ma	升 麻	"	5.0.0	<i>Thalictrum rubellum</i> . It is not a species of hemp, as the Chinese name suggests. These root-stocks are met with as dark brown, irregular pieces, bristled with rootlets and having more or less of the stems attached to them. The inside is fibrous and of a light yellow colour. Szechwan, Shensi, Kansu.	1
Shêng-nan-hsing.....	生 南 星	"	...	See <i>Nan-hsing</i> (南 星).....	1
Shêng-ti (Ti-huang or Shou-ti-huang).	生 地 (地 黃, 熟 地 黃)	"	12.0.0	<i>Rehmannia Chinensis</i> , <i>Rehmannia glutinosa</i> , <i>Rehmannia digitalis</i> , <i>Rehmannia lutea</i> . <i>Shêng-ti</i> is literally the unprepared root, and <i>Shou-ti-huang</i> the prepared drug; in reality, however, this difference is not upheld. The prepared drug is the raw root, which has been repeatedly steamed and sun dried. In appearance the roots are dark, soft, shapeless lumps, with a faint aromatic fragrance. When cut they show a deep black, tenacious texture. The roots are sorted, and the price is fixed according to the number of pieces making a catty, the fewer pieces to a catty the dearer the article. <i>Note</i> .—Up to 10 pieces to the catty constitutes No. 1 quality; to 20 pieces, No. 2 quality; 50 pieces, No. 3 quality; 100 pieces, No. 4 quality. Chihli, Kiangsi, Honan, but chiefly from Shensi.	1

Shih-hui.....	石 灰	Picul	...	Limestone. Used burnt and unburnt..... Middle and Upper Yangtze Valley, also Kwangtung and the North.	8
Shih-kao.....	石 膏	"	...	Gypsum, or sulphate of lime, mainly from Yingcheng (應城), in Hupeh, where there are extensive salt springs. Used as a component of many medicines, to adulterate beancurd, and in cement. When powdered and formed into a paste it is called plaster of paris, and is much used for forming casts. It is also used as manure. <i>Tariff: duty, Hk. Ts 0.0.3.0 per picul.</i>	8
Shih - lien - tzü (or Lien-tzü).	石 蓮 子 (蓮子)	"	...	Stone lotus. The seeds of <i>Nelumbium speciosum</i> and <i>Nelumbium nuciferum</i> . These kernels have the shape of acorns, with a very smooth surface. The flesh consists of two cotyledons with the shoot between them. They are used medicinally and also as food. <i>Tariff: duty, Hk. Ts 0.5.0.0 per picul.</i> Central and Southern China.	5
Shih-liu-huang.....	石 硫 黃	"	...	Sulphur. Chinese sulphur was formerly chiefly obtained from Szechwan. At the present time Formosan sulphur is coming into more general use. Sulphur occurs in shining, greyish-yellow, headed grains, varying in size from duck shot to fine granules. Formosa is said to have, near Kelung and Tamsui, inexhaustible supplies of sulphur. See <i>Import Tariff</i> .	8
Shih-p'í.....	石 皮	"	14.0.0	See <i>Shih-érh</i> (石耳).....	8
Shih-ping.....	柿 餅	"	4.0.0	Persimmon cake. The dried fruit of the <i>Diospyrus Kaki</i> , pressed in pans and afterwards sun dried. Used as food, and medicinally for colds, etc. Central and Southern China.	8
Shih-tan.....	石 胆	"	...	Sulphate of copper.....	8
Shih-yen.....	食 鹽	"	...	Salt, the chloride of sodium of chemists. This substance has been prepared in China for ages. In Shansi and all along the coast large fields, from 300 to 500 yards square, are levelled and surrounded with low, earthen walls. Sea water is pumped into these fields at high water, and left to the action of the sun. This operation is repeated, the salt scraped off, and purified. The salt-wells in Szechwan are another source of salt. Less salt is consumed in China than elsewhere, owing to the Imperial monopoly of the article; and yet it is produced in almost every province. Szechwan, Kansu, Shensi, Shansi, Chihli, Shengking, Shantung, Kiangsu, Chekiang, Fukien, Kwangtung, Yunnan, and Kweichow supply more or less salt. Hankow is ordinarily supplied from Szechwan, from Kiangsu, and from the North.	8

Shou-wu (or Ho-shou-wu).	首烏 (何首烏)	"	6.0.0	Dogbane. Root of <i>Apocymum juvenus</i> . Commonly sold in flat, oblong or round pieces, often of a very irregular shape and thickness. The skin is shrivelled and of a dark, reddish-brown colour. The interior is woody; the taste bitter. When fresh it is called <i>Hsien-shou-wu</i> (鮮首烏). Szechwan, Southern China.	1
Shu.....	朮	"	...	Several species of this plant are found in China, of which the <i>Atractylodes alba</i> (white) and the <i>Atractylodes rubra</i> (red) are the most common. The roots of the former kind, <i>Pai-shu</i> (白朮), are met with in hard, contorted, fleshy, round pieces, about 1 inch or $1\frac{1}{2}$ inches in diameter, and having radicular fibres between the tuberos nodules forming the mass. The outer surface is brown and wrinkled, and the woody flesh of a mixed white and yellow colour, which deepens after a short exposure to air. <i>Yü-shu</i> (於朮) is the best kind of the white species. <i>Liao-shu</i> (料朮) are the debris of this drug. <i>Hsien-shu</i> (鮮朮) is the name of the drug when fresh. The roots of the red species are finger-shaped, occasionally branching, and varying from 1 to 3 inches in length. The cuticle is rough, brown or blackish, and sometimes bristled with roots. The cut surface is of a dirty-white colour, with a yellowish, cortical layer. The structure is very open, and some of the interstices are filled with an orange-coloured, resinous substance. The smell is less aromatic than that of the white variety. <i>Yü-shu</i> (於朮), <i>Ts'ang-shu</i> (蒼朮), <i>Mao-shu</i> (茅朮), <i>Mao-ts'ang-shu</i> (茅蒼朮), <i>O-shu</i> (莢朮), <i>Féng-shu</i> (逢朮), <i>Tung-shu</i> (冬朮), <i>Ching-shu</i> (京朮), and <i>Chung-shu</i> (種朮) are mostly roots of the white species. <i>P'ing-shu</i> (平朮) is a variety called "even" because its qualities are neither pungent nor cooling. Szechwan, Yunnan, Kwangsi, Hupeh, Kwangtung.	1

Ta-hu-ma-tzū.....	大胡麻子	Picul	4.0.0	See <i>Hu-ma-tzū</i> (胡麻子).....	5
Ta-huang (or Huang-liang).	大黃 (黃真)	"	...	Rhubarb. <i>Rheum officinale</i> and <i>Rheum palmatum</i> , from Chihli, Shensi, Kansu, Hupeh, Szechwan, Tibet. The dearest Rhubarb comes from Shensi, and often costs as much as <i>Ta</i> 60 per picul. On the average the Szechwan Rhubarb is very good. Good Rhubarb is of a reddish-yellow colour, variegated or mottled, and firm in texture. The pieces should be dry, and not too light. When chewed the root should grate upon the teeth, have a bitter and sharpish rather than a smooth flavour, and colour the saliva with a deep yellow tinge. The roots are dug up, when from six to seven years old, just before the flowering season, which occurs during the third and fourth moons, and again during the seventh and eighth moons, after the seed has ripened. They are then peeled and cut into pieces, bored through the middle, placed on strings, and hung up to dry. The best known varieties from the North are <i>Hsi-ning</i> (西甯), <i>Chung-chi</i> (中吉), <i>Ch'i-huang</i> (祁黃), <i>T'ai-huang</i> (台黃), and <i>Shan-huang</i> (山黃). <i>Tariff</i> : duty, <i>Hk. Ta</i> 12.5.0 per picul. See <i>K'uai-huang</i> (塊黃).	1
Ta-li-tzū.....	大力子	"	5.0.0	Brownish-grey seeds, resembling small cucumber seeds. Szechwan.	5

Tan-shên.....	丹 參	"	8.0.0	<i>Salvia multiorrhiza</i> . A kind of sage. The root is sold in short, shrivelled pieces, of a bright, brick-red colour, with numerous radicles. The interior is soft, and in taste resembles liquorice. Shensi, Shansi, Shantung, Szechwan.	1
Tan-ti.....	丹 底	"	3.5.0	A brittle, whitish-red substance, in flat pieces and of porous appearance. It is a chemical preparation, and resembles residuum of calomel.	8
Tan-ts'ao.....	胆 草	"	10.0.0	See <i>Lung-tan-ts'ao</i> (龍 胆 草).....	1
Tang-kuei.....	當 歸	"	44.0.0 35.0.0 25.0.0 14.0.0	<i>Aralia edulis</i> . This root is met with in the form of brown, fleshy root-stocks, branching, and dividing into a mass of large, close, pliant rootlets, somewhat like gentian root. The interior is soft, sometimes mealy, and of a whitish or yellow (often deep yellow) colour. The odour is very strong, resembling that of celery, and the taste sweetish, warm, and aromatic. Large quantities are exported from Hankow to Canton and other southern ports, where it is said to enter into nearly all prescriptions for the treatment of diseases of women. Two qualities are acknowledged at Hankow, of which the superior is generally packed in boxes; the drug is then commonly called on the application <i>Hsiang-kuei</i> (箱 歸). The inferior quality is mostly made up in packages, and is then called <i>Pao-kuei</i> (包 歸). Northern China, Szechwan, Yunnan, Kansu, and parts of Hupeh.	1

Tsé-hsieh (or Shui- hsieh).	澤 瀉 (水 瀉)	"	4.5.0	The globular, pear-like, fleshy rhizomes of <i>Alisma plantago</i> , a water plant, from Shantung, Shensi, Honan. The drug coming from Szechwan is said to be the best. It is generally met with in the form of thin, circular sections of the rhizome, from 1 inch to 1½ inches in diameter, of a pale yellow colour, mealy, and slightly bitter in taste, and often worm-eaten. See <i>Ch'uan-hsieh</i> (川 瀉).	1
Ts'ên-yeh.....	參 葉	"	65.0.0	See <i>Jên-shên-yeh</i> (人 參 葉).....	3
Ts'u.....	醋	"	...	Vinegar. A very strong and nauseous vinegar is made from rice by boiling it and keeping it in a warm place for several days, to ferment. It is the only pure acid known to the Chinese. They use it as a solvent, and by sprinkling it upon minerals—see <i>T'ieh-hua-fên</i> (鐵 華 粉) and <i>Yüan-fên</i> (鉛 粉)—exposed to fire, bring about oxidation and solution of these substances. It is also used extensively in medicine, the reviving effects of the fumes of vinegar being understood by the Chinese. All over China; the best from Kwangtung.	8
Ts'ung-jung (Ta-yün, Ts'ao-ts'ung-jung, or Ch'ou - ts'ung-jung).	菰 蓉 (大 雲, 草 菰 蓉, 臭 菰 蓉)	"	26.0.0 16.0.0	The soft root of <i>Aeginetia Japonica</i> . The root appears in soft, large tubers of a deep, dark brown colour. When cut it shows a soft, brown inside, resembling <i>Shêng-ti</i> (生 地). When salted it is called <i>Yen-ts'ung-jung</i> (鹽 菰 蓉). It has a disagreeable smell. Szechwan.	1

Tu-chung (or Mu-mien).	杜仲(木棉)	Picul	30.0.0 15.0.0 8.0.0	<i>Euonymus Japonicus</i> . This bark is generally met with in pieces about 6 inches in length and 2 inches in width, but sometimes in large sheets up to 3 feet long and 1½ feet wide. The latter are the more expensive. When fractured it exhibits a beautiful, silky, elastic fibre, the threads of which are sufficiently tough to demand a vigorous effort to separate them. Szechwan, Honan, Shensi, Shansi.	2
Tu-huo.....	獨活	"	9.0.0 4.0.0	<i>Angelica</i> ? The dark-yellowish, dried root of this "self-moving plant" comes from Hankow and from the banks of the Han River. It is in long, twisted pieces, deeply marked with ribs, both lengthwise and crosswise, with portions of the crowning leaves of the root-stock sometimes still attached. The interior is of a dirty-white colour. Szechwan, Fukien, Honan, Manchuria. See <i>Ch'uan-chiang</i> (川姜), <i>Ch'iang-huo</i> (羌活), and <i>Ch'ien-hu</i> (前胡).	1
T'u - ch'ing - mu - hsiang.	土青木香	"	4.0.0	See <i>Ch'ing-mu-hsiang</i> (青木香).....	1
T'u-fu-ling.....	土茯苓	"	...	See <i>Fu-ling</i> (茯苓).....	1
T'u-pieh-ch'ung.....	土鳖虫	"	24.0.0	"Earth beetle." A large, black beetle with brown cross stripes. It has six legs.	7
T'u-shên-ch'ü.....	土神綳	"	10.0.0	See <i>Shên-ch'ü</i> (神綳).....	8
T'u-ssü-tzû.....	兔絲子	"	4.0.0	Dodder. <i>Cuscuta Chinensis</i> . The seeds of this leafless, parasitical plant are met with as roundish bodies, of the size of black mustard seed, of a brown colour, with little or no taste or smell. Honan, Szechwan, and in the North.	5
Tung - ch'ung - hsia - ts'ao.	冬蟲夏草	"	400.0.0	See <i>Ch'ung-ts'ao</i> (蟲草).....	8
Tung-hua (or K'uan-tung-hua).	冬花(款冬花)	"	18.0.0	Colt's-foot. Flowering scapes with unopened, yellow florets. Szechwan, Kiangsu, Shansi, Shensi.	4
Tung-jên (or Pai-kua-tzû).	冬仁(白瓜子)	"	9.0.0	Pepo seed. The seed of a very large pumpkin, <i>Cucurbita pepo</i> . This pumpkin is sown towards the winter, and the Chinese therefore call it <i>Tung-kua</i> (冬瓜), or "Winter Gourd." Another name for it is <i>Pai-kua</i> (白瓜), on account of the white, waxy colour of its surface. Central China.	5
Tung-kua-p'i.....	冬瓜皮	"	1.5.0	The skin of <i>Cucurbita pepo</i> Central China.	2

NAME.		VALUE.		DESCRIPTION.	Class No.

Wu-ling-tzü.....	五靈子	Picul	4.0.0	Magpie dung. Small, brittle, ovoid, blackish-brown pieces, resembling rat dung.	8
Wu-pei-tzü.....	五倍子(五備子)	"	...	Galls or Nutgalls. Excrescences produced by the attacks of a small insect, which deposits its eggs in the tender shoots of a species of <i>Ihus</i> , the <i>Sumach</i> <i>Rhus semi-reata</i> , or Poison Oak. It is the same tree that furnishes part of the Chinese varnish. The galls are hard, brittle, oblong, horn-like, hollow bodies, about 1½ inches long, and resembling sea shells. They are pointed, or tapering at either end, or triangular, irregular, and tuberculated. The outer surface is velvety, of a yellowish or lightish-brown colour, the thin wall somewhat translucent, and the interior smooth and occupied by the remains of the insect. They are steamed, to kill the insect, and are exported to Europe. Used chiefly as a dye, but also as medicine. <i>Tariff: duty, Hk. Ta 0.5.0.0 per picul</i> . Szechwan. See Mu-shih-tzü (沒石子).	8

Wu-shih-tzū.....	無食子	Picul	...	See <i>Mu-shih-tzū</i> (沒石子).....	8
Wu-wei-tzū.....	五味子	"	11.0.0	"Five-tasted seed." <i>Kadsura Chinensis</i> . The small red berries are wrinkled and contain two reddish-yellow, kidney-shaped seeds. Shantung, Shensi, Anhwei, Szechwan, Fukien. See <i>Pei-wei</i> (北味).	5
Wu-yao.....	烏藥	"	2.5.0	The roots of <i>Daphnis myrrhæ</i> . The greyish, skinned root is generally cut into thin slices of a whitish colour and of slightly aromatic odour. The shrub is said to resemble the Tea plant. Kwangsi, Chekiang, Hunan, Kiangsu, Formosa.	1
Wu-yü (or, Wu-chu-yü).	吳萸 (吳茱萸)	"	24.0.0	<i>Xanthoxylum piperitum</i> . The fruit is a small, dried seed-capsule. The seed has a warm, bitter, and aromatic taste. The drug is generally mixed with the stalks of the fruit. This Pepperwort comes from Honan, Kweichow, Shantung, Szechwan, and Hupeh.	5
Ya-fêng-yeh.....	極楓葉	"	...	<i>Acer trifidum</i> . The leaves of a kind of Maple tree....	3
Ya-lien.....	雅連	"	...	See <i>Shui-lien</i> (水連).....	1
Ya-tou.....	雅斗	"	11.0.0	See <i>Hu-tou</i> (斛斗).....	6
Ya-tsao (Chu-ya-tsao-chia, or Tsao-chia).	牙皂 (豬牙皂莢, 皂莢)	"	16.0.0	<i>Prosopis algaroba</i> . These "hoar-tusk pods" are from 2 to 4 inches long and about $\frac{1}{2}$ inch broad, sickle-shaped, flattened transversely, and the upper edge keeled. They are externally of a glazed, chocolate, and even black colour; internally they are fitted with a spongy, yellowish substance, of an exceptionally acrid taste, containing very small seeds. Used for washing clothes. Shantung, Honan, Szechwan, Kiangsu. See <i>Fei-tsao</i> (肥皂) and <i>Hsiao-tsao-chio</i> (小皂角).	5
		"	11.0.0		
Yang-ch'i-shih.....	陽起石	"	2.0.0	A variety of hornblende. Silicate of magnesia and lime. Irregular masses of a white or greenish-grey colour. The fracture looks silvery and fibrous. From Shantung, where a hill is called Yang-ch'i-shan (陽起山). See <i>Tao-sha</i> (刀砂).	8
Yang-ch'in.....	洋芩	"	4.0.0	An inferior kind of <i>Huang-ch'in</i> (黃芩), which see...	1
Yang-o-huang.....	洋阿黃	"	80.0.0	A beautiful, yellow, apparently resinous substance, in large pieces resembling purified sulphur. Said to be imported from the frontier states to the north of Burma and India.	8
		"	45.0.0

Yang-ts'ao.....	陽 草	Picul	1.0.0	A kind of grass.....	6
Yang-tu-ku(or Yang-tu-ts'ai).	羊肚菇(羊肚菜)	"	18.0.0	Black, wrinkled, bag-like fungi, said to grow in the water. It looks like the skin of bicho de mar after having the flesh removed, and has a similar smell. Szechwan, Yunnan.	8
Yao-hua (Yao-hung-hua, or Hung-lan-hua).	藥花(藥紅花, 紅藍花)	"	15.0.0	<i>Carthamus tinctorius</i> . Dried, red flowers of the safflower, picked when at maturity. When intended to be used as a dye they are picked before they have completely unfolded, and pressed into small cakes. The drug called <i>Hsi-tsang-hung-hua</i> (西藏紅花) comes, as the name indicates, from Tibet, but is a kind of crocus or saffron. Honan, Szechwan.	4
Yao-ts'ai.....	藥 菜	"	...	The common Chinese term for "medicine."	
Yeh-ch'ion-niu.....	夜 牽 牛	"	3.0.0	See <i>Tzū-yüan</i> (紫苑).....	1
Yeh-t'ien-mên-tung..	野 天 門 冬	"	3.0.0	See <i>Pai-pu</i> (百部).....	1
Yen-chiao.....	烟 膠	"	2.0.0	Refuse of tobacco mixed with straw or cow-hair and pressed into cakes. Hupeh.	8
Yen-fu.....	鹽 附	"	...	See <i>Ch'uan-fu</i> (川附).....	1
Yen-ts'ung-jung.....	鹽 菰 苳	"	...	See <i>Ts'ung-jung</i> (菰苳).....	1
Yin-ch'ên (or Yin-ch'ên-hao).	茵 陳 (茵陳蒿)	"	4.0.0	The flowers of a bitter, fragrant herb, <i>Artemisia abrotanum</i> . It is met with in its wild state and also cultivated. Hupeh.	4
Yin-chu (or Chu-sha)	銀 硃 (硃砂)	"	...	Vermilion. Sulphide of mercury. It is made in Hankow much in the same way as the cinnabar. The bright red or dark orange crystals are powdered and then thoroughly ground. It is then sifted, sorted, and packed in glazed, black paper, in quantities of about an ounce. It is exported to England in boxes of 50 catties. Fukien vermilion is said to be the best. Anhwei and Yunnan yield large quantities. Hankow supplies an inferior quality. It has much the same medical properties as the cinnabar, and is believed to be stronger than calomel or <i>Ch'ing-fên</i> (輕粉). <i>Tariff: duty, Hk.Ta 25.0.0 per picul.</i>	8
Yin-hu.....	銀 胡	"	12.0.0	Root-stock of <i>Dupleurum octoradiatum</i> . The drug resembles in shape <i>Ch'ien-hu</i> (前胡) and <i>Ch'ai-hu</i> (柴胡). When fresh it has an agreeable odour. Shensi, Hupeh, Szechwan.	1

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	Hk. \$m.c.		
Yin-hua.....	銀花	Picul	...	See <i>Chin-yin-hua</i> (金銀花).....	4
Yin-yang-ho.....	淫羊藿	"	...	Stalks and leaves of <i>Populus spinosa</i> . The leaves have sharp, irregular teeth on the edge and are downy underneath. Shensi, Shantung, Hupeh.	3
Ying-ch'un-hua.....	迎春花	"	...	See <i>Hsin-i</i> (辛夷).....	4
Yü-chin.....	鬱金 (玉金)	"	15.0.0 10.0.0	Golden Turmeric. Species of <i>Curcuma</i> . The tubers come from the south and west of China, are from $\frac{3}{4}$ inch to $1\frac{1}{4}$ inches in length, and of a greyish-brown colour. On fracture the hard, orange-yellow, translucent interior is seen to be divided into a central and a cortical portion. They are aromatic in smell and taste.	1
Yü-chu (or Wei-jui)..	玉竹 (萎蕤)	"	8.0.0	<i>Bambusa arundo</i> . Pale yellow or brown, brittle, semi-translucent, twisted pieces, pretty evenly jointed, and varying a great deal in length and thickness. The taste is sweet and mucilaginous, and the odour something like that of newly-baked bread. They are very liable to become mouldy. They open out in water to full size. See <i>Jui-jên</i> (蕤仁). From the North, Szechwan, Kiangsu, Fukien, and Chekiang.	1
Yü-jou (Shan-chu-yü, or Shih-chu-yü).	黃肉 (山茱萸, 食茱萸)	"	15.5.0	<i>Cornus officinalis</i> . The shrub is prickled and the flowers white. The red drupes, resembling red dates, are dried, have a sharp taste, and contain a good deal of oil. The juice of these fruits is used in some places to make putty. Kiangsu, Shensi, Shantung, Chekiang, Szechwan, Hupeh.	5
Yü-li-jên.....	郁李仁	"	10.0.0	See <i>Li-jên</i> (李仁).....	5
Yü-p'í.....	榆皮	"	10.0.0	Elm bark. <i>Ulmus Chinensis</i> All over China.	2
Yü-shu.....	於朮	"	18.5.0	Root of <i>Atractylodes alba</i> See <i>Shu</i> (朮).	1
Yüan-chih (or Chih-t'ung).	遠志 (志通)	"	14.0.0	<i>Polygala tenuifolia</i> . The root of this plant is brought from Shensi, Honan, and Szechwan in contorted, quilled pieces, larger than a writing quill, marked transversely, and of a brownish-yellow colour. The taste is sweetish and somewhat acrid. Sometimes the central core has been removed, and appears then in tubular pieces. This drug is called <i>Chih-jou</i> (志肉) or <i>Yüan-chih-jou</i> (遠志肉).	1
Yüan-ching-shih.....	元 (玄) 精石	"	17.0.0	Selenite. Small, hexagonal, flint-like, brownish crystals. Sulphate of lime. Shansi, Chihli, Yunnan, Kiangsu.	8

NAME.		VALUE.		DESCRIPTION.	Class No.
Transliterated (WADE'S System).	Chinese.	Per	Hk. Tam.c.		
Yüan-fèn (or Pai-fèn)	鉛粉 (白粉)	Picul	...	White lead. Ceruse. Carbonate of lead. Lead is melted and run into thin sheets, which are further rolled into rough tubes. These tubes are packed into a large, wooden vessel, containing a quantity of vinegar in a separate vase. The vessel is luted down with a mixture of salt and mud, the latter laid upon a surface of paper covering the mouth. The vessel is then heated by placing it in a <i>kang</i> with warm ashes. The lead is slowly acted upon for a week by the vinegar, the heat being kept up, and in this manner entirely converted into carbonate of lead. <i>Tariff: duty, Hk. Ta 0.3.5.0 per picul.</i> Hunan, Kwangsi, Chekiang, Yunnan, Chihli.	8
Yuan-hua.....	芫花	"	4.0.0	Small, dried, downy flowers of <i>Passerina chamædaphne</i> ; it is a kind of Colt's-foot. Also used to colour preserved eggs. From the North, Hupeh, Kiangsi, Szechwan.	4
Yuan-ming-fên.....	元 (玄) 明粉	"	...	See <i>Ming-fên</i> (明粉).....	8
Yüan-shên (or Hei-shên).	芫 (玄) 參 (黑參)	"	3.0.0	"Black Ginseng." <i>Scrophularia Oldhami</i> or <i>Scrophularia alata</i> ; according to others, <i>Rehmannia glutinosa</i> . These roots have some resemblance to Ginseng, are 3 or 4 inches long, and nearly 1 inch in diameter in the middle, tapering off to either end. They are brown externally and very irregularly furrowed and wrinkled. They are fleshy and dark internally, and moist when fresh; they have very little smell, and the taste is raw and sweetish. From the northern and western provinces.	1
Yüeh-shih (or P'êng-sha).	月石 (蓬砂, 硼砂)	"	20.0.0	Borax. A compound of soda and boric acid. It exists naturally and is also prepared in large quantities artificially. The principal sources of the natural borax are the lakes of Tibet, where it is collected from the deposit continually being made by evaporation. It is sold in a partially refined state, in broken masses of white, transparent crystals, showing oblique, rectangular prisms, and on one surface often presenting a layer of large, reddish-brown crystals. It is sometimes further refined for use by silversmiths in soldering, as well as in medical practice. Its further uses are as a flux for metals and as an ingredient of glass and porcelain. An unrefined, yellowish variety met with in China is said to come from the countries to the south; it is called <i>Huang-p'êng-sha</i> (黃蓬砂).	8
Yün-mu-fên.....	雲母粉	"	5.0.0	A silvery-white, shining flour, obtained by crushing and powdering mother-of-pearl shells. It is unctuous to the touch. Often adulterated with <i>Mou-li-fên</i> (牡蠣粉) and also with powdered <i>Hua-shih</i> (滑石).	8

DESCRIPTIVE PARTICULARS OF SOME OF THE "SUNDRY"
MEDICINES EXPORTED FROM HANKOW.

No.	NAME IN CHINESE.	NAME TRANSLITERATED.	ORIGIN, NATURE, AND METHOD OF PREPARATION.
		C.	
5	蟬衣	Ch'an-i.....	A wooden mass forming on the bark of trees after some insects have deposited their eggs.
5	蟬退	Ch'an-t'ui.....	A beetle larva.
11	鵝血膠	Chi-hsüeh-chiao.....	A medicinal glue made into a cake.
13	假沉	Chia-ch'ên.....	Imitation garoo-wood.
16	甲片	Chia-p'ien.....	Scales of a kind of ant-eater or armadillo.
17	殭虫	Chiang-ch'ung.....	Dried silkworms.
39	青金石	Ch'ing-chin-shih.....	Golden mica.
40	輕粉	Ch'ing-fên.....	A mercurial powder (calomel), in the form of beautiful, feathery, white, crystallised flakes.
45	青黛	Ch'ing-tai.....	A fine blue powder resembling dried indigo.
48	青鹽	Ch'ing-yen.....	Mineral salt in the form of blackish, cubic crystals.
50	秋蒿	Ch'iu-hao.....	A herb with small yellowish flowers attached.
51	九香虫	Chiu-hsiang-ch'ung...	Insect.
52	秋石	Ch'iu-shih.....	A preparation made of urine and salt. It is in small cakes, crystalline, deliquescent, and evidently moulded in little cups.
54	竹黃	Chu-huang.....	A siliceous concretion met with in hard, broken, angular, opaque pieces, smooth as porcelain, of a white or bluish colour.
59	硃礪	Chu-p'iao.....	A beautiful red, chalky substance resembling vermilion.
73	虫草	Ch'ung-ts'ao.....	A fungus, half insect half plant. Sold in small bundles. Each of the many pieces forming the bundles consists of two distinct portions: one, which is larger, belonging to an insect of a yellowish-brown colour, more than an inch long, showing rings, joints, and more or less of the characteristic structure of the grub; and the upper fungous portion, consisting of a spurred filament of a greyish-brown colour, flexible, more or less twisted, and internally of a light colour.
78	橘絡	Chu-lo.....	The dried threads of the fruit which covers the pulp of the sweet mandarin orange.
81	全虫	Ch'üan-ch'ung.....	Scorpions.

No.	NAME IN CHINESE.	NAME TRANSLITERATED.	ORIGIN, NATURE, AND METHOD OF PREPARATION.
F.			
88	浮甘石	Fu-kan-shih.....	Zinc-bloom (magnesia).
89	浮甘石片	Fu-kan-shih-p'ien.....	Zinc-bloom scrapings.
93	佛手片	Fu-shou-p'ien.....	The peel of a kind of citron, dried.
H.			
94	海金沙	Hai-chin-sha	A mineral sand of a reddish-brown colour.
95	海石	Hai-shih	A mineral stone.
112	象皮	Hsiang-p'i.....	Elephant's skin.
121	雄黃	Hsiung-huang.....	A mineral in heavy masses of an orange-yellow colour.
122	熊膽	Hsiung-tan.....	Bear's gall.
130	花乳石	Hua-ju-shih.....	A mineral stone.
131	滑石	Hua-shih.....	Mineral of a pale yellowish colour.
132	淮山	Huai-shan.....	Prepared yam roots. Hard, smooth, beautifully white, tapering pieces.
148	紅粉	Hung-fên.....	Mineral powder.
149	紅升丹	Hung-shêng-tan.....	Residuum of calomel.
J.			
153	然銅	Jan-t'ung.....	A mineral.
154	戎鹽	Jung-yen.....	A mineral salt in the form of blackish, cubic crystals.
K.			
156	甘石	Kan-shih.....	Magnesia (zinc-bloom).
165	穀虫	Ku-ch'ung.....	Larva of flies.
170	塊黃	K'uai-huang.....	A mineral.
174	龜板	Kuei-pan.....	The under shell of the land turtle.
175	龜板渣	Kuei-pan-cha.....	The under shell of the land turtle, broken.
L.			
178	雷丸	Lei-wan.....	A fungus in irregular rounded globules; masses of a dark or greyish-brown colour.
181	瓦石	Liang-shih.....	A mineral stone.
183	蓮鬚	Lien-hsü.....	"Whiskers" of the lily flower.
187	靈慈石	Ling-tz'ü-shih.....	A mineral ore.
188	羚羊角	Ling-yang-chio.....	Horns of the antelope.

NO.	NAME IN CHINESE.	NAME TRANSLITERATED.	ORIGIN, NATURE, AND METHOD OF PREPARATION.
193	萋皮	Lou-p'i.....	Melon peel.
194	蘆會	Lu-hui.....	A gum-resin of a coal-black colour, resembling pressed coal dust.
195	爐甘石	Lu-kan-shih.....	Magnesia (zinc-bloom).
198	龍齒	Lung-ch'ih.....	Fossil teeth.
199	龍骨	Lung-ku.....	Fossil bones.
M.			
204	馬勃	Ma-p'o.....	A medicinal fungus.
212	米鈎	Mi-kou.....	A thorn, looking like double fish hooks.
213	密陀僧	Mi-t'o-sêng.....	A mineral.
218	薺孤	Mo-ku.....	A bulb.
222	牡蠣粉	Mu-li-fên.....	A powder made of sea-shells.
N.			
229	礶砂	Nao-sha.....	Sal ammoniac.
233	牛膽	Niu-tan.....	Ox gall.
P.			
239	白降丹	Pai-chiang-tan.....	Residuum of calemel.
242	柏合	Pai-ho.....	The desiccated leaves or sections of the bulbs of a species of tube rose.
259	鱉甲	Pieh-chia.....	Carapace of a species of fresh-water turtle.
263	朴硝	P'u-hsiao.....	Sulphate of soda.
S.			
273	山藥	Shan-yao.....	Prepared yam roots. Hard, smooth, beautifully white, tapering pieces.
281	神麴	Shên-ch'ü.....	A medicinal cake.
288	石耳	Shih-êrh.....	A medicinal fungus.
289	石蟹	Shih-hsieh.....	Fossil crabs.
294	手片	Shou-p'ien.....	The peel of a kind of citron, dried.
T.			
308	代赭石	Tai-chê-shih.....	A mineral (blood-stone).
310	丹粉底	Tan-fên-ti.....	A mineral (prepared).
352	土蠶虫	Tu-pieh-ch'ung.....	Insect.

No.	NAME IN CHINESE.	NAME TRANSLITERATED.	ORIGIN, NATURE, AND METHOD OF PREPARATION.
355	冬蟲夏草	Tung-ch'ung-hsia-ts'ao	<i>See</i> Ch'ung-ts'ao.
358	冬瓜皮	Tung-kua-p'í.....	Melon peel.
362	通草	T'ung-ts'ao.....	Pith; when in layers, known by the name of rice paper.
367	自然銅	Tzū-jan-t'ung.....	A mineral.
368	紫石英	Tzū-shih-ying.....	A kind of spar of different colours.
370	刺猬皮	Tz'ü-wei-p'í.....	Skin of the common hedgehog.
W.			
377	蜈蚣	Wu-kung.....	Centipedes.
Y.			
385	陽起石	Yang-ch'i-shih.....	Hornblende.
388	羊肚菜	Yang-tu-ts'ai.....	A medicinal mushroom.
390	煙膠	Yen-chiao.....	A medicinal glue made into a cake.
401	元精石	Yüan-ching-shih.....	A mineral.
404	月石	Yüeh-shih.....	Borax.
405	雲母粉	Yün-mu-fên.....	A powder made of mother-of pearl shell.
